A modern office interior featuring a large, modular wooden shelving unit with a black metal frame. The unit includes open shelves, a long wooden bench with a grey cushion, and closed wooden cabinets. A window on the right side offers a view of greenery outside. The ceiling has track lighting. The overall aesthetic is clean and functional.

.CUBICS MODULAR SHELVING SYSTEM

DESIGN BY

.PLANQ

Cubics cabinet

A XXL Cubics cabinet configured in a 'double' grid, boxes finished with Reziq® Veneer Suits and regular decor shelves.

.CUBICS MODULAR SHELVING SYSTEM

DESIGNED TO BE FLEXIBLE, MADE TO LAST FOREVER.

The Cubics is a multifunctional, flexible display- and storage system, made from innovative and recycled materials. The 20 x 20 mm steel tube frames give rise to a sleek and timeless design, for both work and the domestic environment. Finish the Cubics with modular closed and open boxes to create a lively and yet clean space.

The Cubics cabinets are available with various accessories. For example, small boxes (400 x 400 mm), high boxes (800 x 400 mm), or double boxes (800 x 800), which can be retraced on two sides. The closed boxes are standard equipped with a push-to-open system. For the finishing touch, add planters for a greener space, bench units for lounging, TV boxes for a meeting, and not to mention lockers for the shared offices and spaces.

.THE SYSTEM IS SIMPLE

Cubics create atmospheres and spaces that bring people together and enable users to be as comfortable in the workspace as at home. It offers ultimate flexible solutions for storage, organization, and display while remaining distinguished by its simplicity.
